

FACTSHEET

Plant Maintenance Order

➔ **AUTOMATIC DOCUMENT ATTACHMENT & OUTPUT SOLUTION FOR PLANT MAINTENANCE**

SEAL Systems DOM solution facilitates the automatic attachment and output of supplementary documents to SAP business objects

SEAL Systems DOM solution ensures that the print function within SAP Plant Maintenance allows the user to output the Work Order with the appropriate documents attached, *regardless of the format & storage locations of the documents*

- In the correct sequence
- Bundled together
- To any printer in the network
- As one print job

Output options include printing, plotting, e-mailing, faxing

Without SEAL Systems DOM solution, the process is inefficient & time consuming as it requires:

- Manually searching for the documents
- Individually printing each document
- Manually sorting & collating the documents

Without SEAL Systems DOM solution, the process is also insecure & risky as there is the potential for human error by:

- Omitting crucial documents
- Printing the wrong version of a document
- Getting them in the wrong sequence

SEAL Systems DOM solution ensures full compliance with:

- OH&S rules
- Corporate governance
- Audit requirements

It is the only Document Output Management software which is:

- Certified by SAP
- Designed for all SAP modules
- Designed for high volume output
- Compatible with all document formats & file locations
- Server-based

Plant Maintenance Order

Features

- Interactive single or collated printing from the DMS using the 'Print Originals' button
- The ability to print from the product structure browser
- The ability to automatically print the Work Order and all the documents associated with the order
- Soft-Barcoding support
- Stamping, watermarking & page numbering
- Support for all printers and plotters
- The ability to generate banner and trailing pages, with distribution information
- The ability to automatically save the output in SAP for later retrieval

- **Documents which can be attached to Work Orders include:**
 - Safety instructions
 - Work procedures
 - Technical drawings
 - Wiring diagrams
 - Equipment images

Benefits

- **Reduce risk and avoid errors**
 - Consistent and auditable process through stamping and watermarking
 - Tight integration of the documents within the business process
 - Use of watermarks and stamping ensure documents are "linked" to the business context
 - Time/Date stamps and distribution details ensure auditable document control

- **Save time and money**
 - No manual printing or PRN generation
 - No manual searching for documents
 - Sequenced, collated output, all from within SAP
 - Automatic batch printing
 - Integrated distribution
 - Effort to find and print documents is greatly reduced

- **Avoid redundancy and increase document control**
 - Store the documents only once – no need for multiple formats or PCL files
