

FACTSHEET

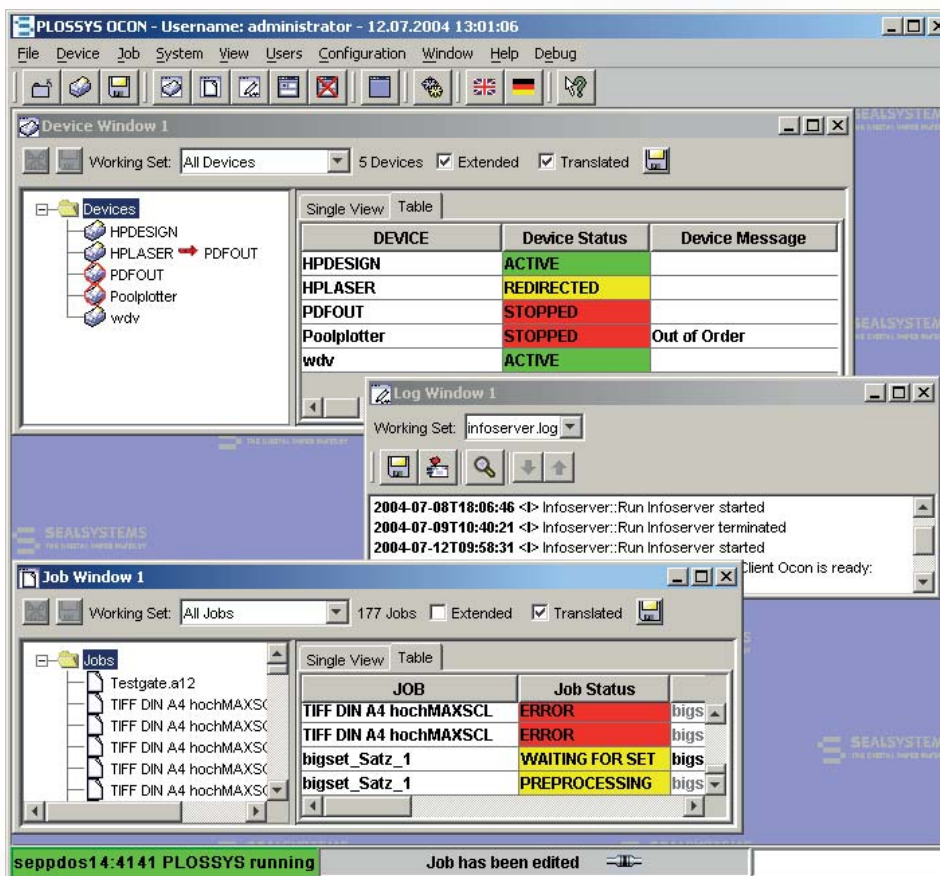

PLOSSYS® netdome

OCON+

OPERATOR AND SYSTEM CONSOLE FOR PLOSSYS® NETDOME //

The Document Output Management System PLOSSYS® netdome is delivered together with a modern user and administration environment. One or more PLOSSYS® servers can be easily watched and controlled by OCON.

This operator tool is delivered as a standard package in the current version of OCON. It is supplied in the server package for no charge. Many additional services and advanced functions can be activated and used via the professional version OCON+.

The screenshot displays the PLOSSYS OCON software interface. The main window is titled "PLOSSYS OCON - Username: administrator - 12.07.2004 13:01:06". It features a menu bar (File, Device, Job, System, View, Users, Configuration, Window, Help, Debug) and a toolbar with various icons. The interface is divided into several panes:

- Device Window 1:** Shows a tree view of devices (HPDESIGN, HPLASER, PDFOUT, Poolplotter, wdv) and a table of device status.

DEVICE	Device Status	Device Message
HPDESIGN	ACTIVE	
HPLASER	REDIRECTED	
PDFOUT	STOPPED	
Poolplotter	STOPPED	Out of Order
wdv	ACTIVE	
- Log Window 1:** Displays system logs for "infoserver.log".

```

2004-07-08T18:06:46 <-> Infoserver::Run Infoserver started
2004-07-09T10:40:21 <-> Infoserver::Run Infoserver terminated
2004-07-12T09:58:31 <-> Infoserver::Run Infoserver started
      
```
- Job Window 1:** Shows a tree view of jobs (Testgate.a12, TIFF DIN A4 hochMAXSC, bigset_Satz_1) and a table of job status.

JOB	Job Status	
TIFF DIN A4 hochMAXSCL	ERROR	bigset
TIFF DIN A4 hochMAXSCL	ERROR	bigset
bigset_Satz_1	WAITING FOR SET	bigset
bigset_Satz_1	PREPROCESSING	bigset

At the bottom of the interface, a status bar shows "seppdos14:4141 PLOSSYS running" and "Job has been edited".

::: BENEFIT

- Web technology: no client installation; executable in Web browser or as application
- Context sensitive menus, configurable tool bars, tool tips
- Context sensitive online support, status line, progress display for actions that require more time
- Simple language configuration during runtime. English and German are provided as a standard. Simple extensions for other languages available.
- Dynamic displays, colored marking of definite parameter values.
- Preconfigured and user configurable working sets to control, which data is displayed and how.
- User configurable scenarios (layout of the displayed windows and active working sets)
- User and authorization management
- Device, job and station administration; display of protocol information
- Multi server concept
