

FACTSHEET

Stamp & View for SAP ArchiveLink

➔ VIEWING OF STAMPS AND WATERMARKS

// Document data and status information can be displayed for archived documents. Configurable data from SAP are mapped into the original file by applying the „Stamp-before-View“ method. This makes important information for document distribution and control visible with the viewer.

The screenshot displays the SAP ArchiveLink interface. The top window shows a 'Normalbestellung 4500012683' created by Martin Mueller. Below it, a table lists materials with their respective quantities and prices:

S	Pos	K	P	Materia
	10			40-100
	20			40-100
	30			40-100
	40			40-100

The main window shows a PDF document titled 'Rechnung' (Invoice) for '1271023169881'. The invoice details include:

- Project: 2090289koprn/2090289/DL
- Abrechnungszeitraum: 01.03.2010 bis 12.04.2010
- Kunde: SEAL Kunde
- Location: Rottenbach, den 12.04.2010

The invoice table lists items and their costs:

Item	Std.	Price	Total
Intern Entwicklung	23,00	€	133,75
2 Intern Projekt	4,00	Std.	545,00
Summe		€	3.678,75
19,0% MwSt.		€	698,96
Gesamtsumme		€	4.377,71

The document is stamped with 'Interne Kopie' (Internal Copy) diagonally across the page. A box highlights the invoice number: 'Rechnungs-Nr. 1271023169881'. At the bottom, there is a SEALSYSTEMS logo and the text 'Firmenlogo als Grafikstempel'. The footer includes 'User: Hans Mustermann', 'SEAL Systems AG, Lohrhubweg 4, 91341 Rottenbach', and 'Seite 1 von 1'.

Stamp & View for SAP ArchiveLink

☐☐☐ BENEFIT

ISO 9000 conformal document control also at viewing. TIFF and PDF documents are always displayed with the actual SAP object data.

This information is also printed out of the viewer. Misapprehensions are avoided.

By standardized configuration the form and content of additional labelling and marking for PDF and TIFF are the same and are considered by all corresponding viewing applications.

☐☐☐ LAYOUT PARAMETER

They are adjustable by using an editor with preview function.

Text attributes

- Font size and color
- Text alignment (centered, left and right/left justified)
- Font width
- Font type, selection from over 50 font types
- Character spacing and width
- Mirrored texts

Stamp and watermark attributes

- Position, size and angle
- Frame (yes/no)
- Frame color
- Rotation of stamp or watermark with drawing
- Scaling of stamp or watermark with drawing
- Definition of content with metafile (graphics)
- Delete background of stamp or show only text in background
- Repeated output of a stamp or watermark over complete document (line or column-wise possible).

The actual data and time can be output according to the format of user settings in SAP, for example DD.MM.YYYY HH.MM.SS.

☐☐☐ ORIGINAL FILE FORMATS

- PDF
- TIFF/G4
- Further formats (Office/CAD) available

☐☐☐ VIEWER

- Acrobat Reader
- SAP Viewer, EAI/ECL, Imaging, Imagenation
- other PDF viewer tools
- other TIFF viewer

☐☐☐ SAP INTEGRATION

Business AddIn for AL-Viewer

☐☐☐ CONFIGURABLE STAMP DATA

- Object data
- Context
- Date/Time
- Environment variables
- User data
- Text elements

☐☐☐ CONFIGURABLE USEREXITS

- For retrieval of stamp data
- For identification of additional editing and display functions

☐☐☐ SYSTEM REQUIREMENTS

Windows or UNIX as client or server platform.

☐☐☐ RELATED PRODUCTS AND OPTIONS

DMS-VWS / SP-VIEW

Stamp & View for SAP DVS

DMS-VWX

Stamp & View for SAP DMS „extended function set“

AL-VWS/RM-VIEW

Stamp & View for SAP Records Management

☐☐☐ PRODUCT CODE

AL-VIEW / AL-VWS

☐☐☐ LICENSING

Each method (input/output/server) and location; no limitation of number of users or SAP user-related licensing without limitation of SAP locations.

☐☐☐ SCOPE OF DELIVERY

SAP Transport and Stamp process for server

☐☐☐ INSTALLATION

- By SAP basis as Transport
- By SEAL Systems on the stamp server
- NO changes or installation on the front end necessary
